

Information Security Consultancy Services

Every day we hear of new security breaches and an unprecedented rise in cybercrime. Add to that the continual barrage of critical security vulnerabilities that need to be patched and most companies are facing a worrying time with regard to managing their company's security and ensuring they don't become that next news headline.

Do you have a specific security challenge, worry about how you would handle an incident or want to know how at risk you are?

Pasporte's Information Security Consultancy services are ideally positioned to give you the assistance you need, when you need it. Our team of experienced and qualified InfoSec experts can provide professional tailor-made InfoSec services to specifically address those issues that are keeping you awake at night.

Typical service elements:

- Strategic and IT advice and support
- Policy, procedures and IT standards development
- InfoSec awareness education
- Application penetration testing
- Internal and external vulnerability testing
- Risk assessments
- Computer forensics
- Infrastructure scanning (privacy info/illegal/indecent images)
- Gap analysis (ISO 27001, PCI)

Pasporte Information Security specialists have years of experience in designing, implementing and managing both InfoSec and external facing security initiatives for companies of all sizes, in multiple business sectors. All are CISSP, CISM and ISO 27001 Lead Auditor qualified. At a time when the potential impact of a breach can be catastrophic, it's good to know they're on your side, providing advice and support on tap.

To arrange an informal discussion with a Pasporte Security & Compliance Specialist or for a free of charge deskside review of your existing security framework, policy documentation and business priorities, speak to your account manager or CSM
