

# Virtual Information Security Manager

With an unprecedented rise in cybercrime, a continuously moving legislation landscape and a constant barrage of critical security vulnerabilities that need to be patched, staying on top of your company's Security and Compliance issues can be a nightmare.

With a Pasporte Virtual Information Security Manager, you can add the experience and qualifications you need to supplement your own resource, freeing you to concentrate on growing your business.

Our Virtual Information Security Manager service gives you access to your own ISM who, as an extension to your organisation, can help you stay on top of all these issues and keep your business in good shape.

#### Typical service elements:

- Risk/compliance assessment of specified change requests
- Security incident escalation, response and co-ordination
- Pro-active InfoSec risk management
- InfoSec governance of critical projects
- Consultancy to business & IT
- InfoSec audit plan management - vulnerability/penetration
- Manage Identify/Access Management (role/account provision)
- Serve on customer's IT/Data Governance Steering Committees
- Provide Board with monthly report showing adherence to
- InfoSec SLAs and KPIs

Virtual Information Security Manager is an extremely cost-effective and affordable way to manage all these areas, and stay in control.

You'll gain access to the highest qualified ISM's, providing you with a flexible combination of days on-site, unlimited email and phone support, fully integrating with your existing organisation and leveraging Pasporte's hosting services.

**To arrange an informal discussion with a Pasporte Security & Compliance Specialist or for a free of charge deskside review of your existing security framework, policy documentation and business priorities, speak to your account manager or CSM**
